

## Cloud Computing by Superior Solutions

Cloud Computing is the popular name being given to renting software as a service on a pay as you go basis. In 2008, whilst investigating a number of options in order to provide one of its hedge fund clients with the best possible IT solution to suit its needs, the team at Superior Solutions became aware that Cloud Computing had made a giant step forward. No longer was it only useful for individuals wanting to do internet banking, online shopping or visit social networking sites, Superior Solutions now saw the rapidly growing importance of Cloud based solutions across a wide variety of business sectors. In 2009 further research shows a rapid rise in the use of a wide variety of such solutions as organisations large and small come to understand the benefits more clearly. We are convinced that Cloud computing is now on the verge of becoming the norm for business use as on-premise IT infrastructure gradually wanes in popularity.

To its clients in Asia Pacific, Superior Solutions offers the following integrated desktop systems which promote work and team collaboration thus improving business performance.

**Email**

**Calendars**

**Tasks**

**Memos**

**Document Management**

**Client Relationship Management**

**Blackberry Enterprise Server**

**Instant Messaging**

**Auto Email Archiving**

All the above services are delivered out of world class data centres giving the highest levels of security and reliability thus ensuring peace of mind that your data is safe at all times and no further business continuity planning is required.

**When you choose Cloud Computing with Superior Solutions you get:-**

- Low start-up cost
- Low cost for sporadic use
- Ease of management
- Scalability
- Device and Location Independence
- Guaranteed Security

Superior Solutions is leading the way in Asia in offering its clients the benefits of Cloud Computing. In addition to advising our clients and helping them get started, we also offer business process optimisation in which we can configure, bespoke and integrate the chosen systems to achieve maximum benefits.
